

Professional Scrum Master (PSM I) Overview

OPTILEARN
TRAINING THAT YOU CAN TRUST

The Scrum framework is leveraged by 77% of software teams across the world in one form or another (State of Agile Report, 2021), with more and more reaping the benefits of it each day. Our experience as a training provider has consistently shown that the teams who are knowledgeable about how to apply Scrum correctly will experience an improved value delivery to their customers.

In partnership with Scrum.org (the industry-standard accreditor for Scrum certifications), we provide professional-level classes to improve your understanding of Scrum and provide one or more free attempts at the associated certification for each class.

This course is appropriate for students in any industry where teams are working to solve complex problems, specifically, practitioners involved in product delivery using Scrum.

The course, developed by Scrum.org, uses a combination of instructor-led and activity-based learning where students work together in teams. Professional Scrum Trainers (PSTs) bring their own Scrum Master experiences and stories to the class and use their skills as professional trainers to deliver the material using their own unique delivery style. The result is an engaging, enjoyable learning experience where students gain a deep understanding of Scrum theory and principles, the Scrum Master accountabilities and why each element of the Scrum framework is important.

In order to maintain the highest quality training, Scrum.org selects only the most qualified instructors to deliver their courseware. The curriculum and learning objectives are standardised to ensure consistency and quality for students worldwide. To uphold this, we provide one or both of our in-house Professional Scrum Trainers to facilitate all of our workshops. Read more about them below.

All training classes are delivered virtually or physically as two full days or four half days and will be facilitated in either GMT or EDT timezones. At a minimum, each class contains 14 hours of trainer contact time with no pre-recorded material used. Please note that all materials and resources used in the classes will be made available to you afterwards.

The benefits for attending our classes are:

- A free attempt at the industry-standard PSM I assessment (with a second opportunity available if needed within 14 days).
- 14 PDUs for PMI can be claimed for attendance.
- Lifetime certification from Scrum.org.
- 40% discount on the PSM II assessment.

The pricing of each class is dependent on your geographical market, tax status and the number of participants. More information on what we determine to be primary, secondary and tertiary markets can be found [here](#).

Students leave our courses with an appreciation for Professional Scrum, and how to deal with common myths and impediments to agility. They gain the knowledge and understanding about how to apply the appropriate practices and techniques that will be beneficial for their Scrum Teams.

If you are interested in registering for a place on one of our upcoming PSM I classes, please find our availability [here](#). If you don't find a date that works, please contact us for details and a quotation for a private class for your organisation - enquiries@optilearn.co.uk.

We look forward to seeing you in one of our classes soon.

Meet one of our trainers - Ryan Brook

Ryan is an experienced Scrum Master, Agile Coach and educator and also holds Qualified Teacher Status. He is an active consultant, working with clients primarily in the software domain, but has experience leveraging agile frameworks in a variety of product development environments.
