TRAINING THAT YOU CAN TRUST

# HELPING YOUR ORGANISATION SUCCEED WITH AGILITY

**OPTILEARN**  
TRAINING THAT YOU CAN TRUST

## OUR PAST CLIENTS INCLUDE

# OPTILEARN'S CONSULTANCY SERVICE

Across the world, industries are facing unprecedented change. Organisations struggle to maintain pace and consequently they notice their returns on investment devolving into a downward spiral. In order to

maintain your maximum value offering you need to innovate your products and services, motivate your staff and improve on your ability to pivot to changing market conditions – you need organisational agility.

# AGILE ORGANISATIONS ARE SUCCEEDING

It is no surprise that agile organisations are succeeding over their competitors. They are structured in such a way that they can flexibly form around a problem space and rapidly prototype solutions. They can respond to new opportunities, therefore beating their competitors to production.

Our consultancy service is different from most large

consulting organisations. We won't just point out your problems, but we'll stick around until you feel able to resolve them. You will get the benefit of our experiences in training, coaching and modelling best practices. Having said that, what you won't get from us is a group of 'yes' people – we'll tell you how it is and hopefully you'll still want to work with us to take the first step.

Supporting teams

Filling niche  
skill gaps

Scaling  
your delivery to  
maximise value

Change  
towards an agile  
transformation

# WE HAVE THE EXPERIENCE

Whether you need a single person or a group of professionals, we have consultants all over the world able to hit the ground running. They are vastly experienced with product complexity and will work with you to support your ambitions. Whether that includes:

- ✓ **Scaling your delivery to maximise value**
- ✓ **Organisational change towards an agile transformation**
- ✓ **Supporting teams who have lost their way**
- ✓ **...or filling niche skill gaps**

*We have experience with all of these.*

# BOOK A FREE, NO OBLIGATION CONSULTATION

If you'd like to find out more about our consultancy service, hear about our current clients, or to share more about your requirements, we would encourage you to book a free, no obligation consultation using the relevant contact details.
